GARAGE STORAGE FOR TODAY'S NEEDS

Elfa has been creating more space in homes since the 1940s. Many homes still benefit from solutions installed up to 75 years ago.

But what about storage for the 2020s? **Garage+** is a result of our in-depth exploration of today's consumer needs. It's a solution specially adapted for garages, sheds and other backroom storage, with an extra-strong steel construction for storing and organising everything from sports equipment to heavy tools.

Garage+ also features new, smart functions, such as special cabinets for valuables and hazardous chemicals. It's designed for modern needs and with the same high quality

STYLISH AND FUNCTIONAL

A matte, grey surface that's pleasing to see and touch. Colour-matched materials and smooth, jointless transitions provide a minimalist feel, while closable cabinets create a

calm impression. **Garage+** is as stylish as it is functional – and it's been thoroughly tested, so you can be sure it'll withstand both DIY projects and rugged, heavy loads.

BUILT TO LAST

There's a reason **Garage+** is made of steel. Steel can be shaped and stretched without losing its strength. It can also be recycled into new products later on. Thanks to these unique properties, steel is used in everything from buildings and cars to outdoor furniture – including smart garage storage.

OUR STRENGTH - YOUR ADVANTAGE

Elfa stands for quality, functionality, and creating more space in everyday life. With **Garage+** you get everything we're known for in a neat and practical system that solves all your storage needs - for many years to come.

A vertical black bar with white text and a background image of cycling gear. The background image shows a white cycling water bottle with a black cap and a black and white bicycle chain on a white surface. The text is centered on the black bar.

10-year warranty

Our 10-year warranty covers both damage caused by normal wear and tear in a garage/workshop environment deriving from material- and/or production defects, as well as any functional defects on moving parts on interior products with pull-out function.

Designed in Sweden

Our storage solutions are designed in Sweden, where they are also mainly produced.

Thoroughly tested

We always make sure to thoroughly test all products in our own production facilities, so you can feel confident that your storage solution lives up to its promises.
